FORD RANGER SUPER DUTY

V6 3.0L ENGINE

4500 GVM

## A NEW BENCHMARK in travelling luxury.

This is the motorhome we've spent twelve months earning the right to build. Engineered from the chassis up on the latest Ford Ranger Super Duty and informed by feedback from more than 100 four-wheel drive customers, the Conqueror 3.0 doesn't borrow from the past. It sets a new standard for what a touring motorhome should be.

*We haven't adapted a current model. We've completely redesigned, redeveloped and re-engineered a motorhome suited to the same standards as the chassis it sits on.*

The Super Duty's wider track let us extend the body without compromising stability or off-road capability — and we used every millimetre. Bigger beds. Real storage. A kitchen built for cooking, not for show. Space where it matters, on a chassis that goes anywhere you point it.

Underneath, the electrical system delivers what we call **independence for travel**: 600Ah of Victron lithium standard, 850W of solar across multiple controllers, and a 3000W inverter running a diesel hot water system on solar alone. Off-grid, indefinitely, without thinking about it.

### 01 THREE BEDS, ONE DECISION

East-west queen, north-south singles, or the largest bed in our range, the north-south queen.

### 02 INDEPENDENCE FOR TRAVEL

600Ah Victron lithium, 850W solar, 3000W inverter, diesel hot water. Off-grid is the floor.

### 03 GALLEY KITCHEN

Induction cooktop, microwave with grill and air-fry, double-locking drawers, 150L fridge.

### 04 LOUNGE & BATHROOM

L-shaped lounge, separate toilet and shower, flip-down Italian basin, panoramic windows.
